

Online Automated Backup Plan

Security

- **128-bit SSL encryption:** safely secures your data during transport.
- **448-bit Blowfish encryption:** safely secures your data to servers.
- **Private encryption key options:** Choose 448-bit key or manage your own private key to encrypt your data.
- **Near Continuous Data Protection:** automatically detects and backs up new and changed files.

Performance

- **Automatic or scheduled backup:** Tell LDP Solutions when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
- **Block level incremental backups:** Saves bandwidth and ensures future backups are fast.
- **Bandwidth throttling:** You can tell the software to use more or less of your upload bandwidth so other higher priority services can run unimpeded.

Ease of Use

- **Version (snapshot) support:** Users have the option of restoring from multiple file versions up to 30 days in the past.
- **Backs up SQL, Exchange and file servers:** Protect mission-critical data easier than ever.
- **Network Drive support:** The ability to back up networked or mapped drives
- **Windows Server support:** In addition to Windows Vista and XP, also backs up your Windows 2003 and Windows 2000 servers. 64-bit Windows is supported.
- **Open/locked file support:** No need to close files in order to back them up. Online Backup backs up all open and locked files, including Outlook PST files.
- **Easy-to-use interface** was designed with the "non-tech-savvy" user in mind. It's as simple as selecting the files to back up, scheduling the times, and letting the software do the rest.

Pricing

- **Desktop Licenses:** \$10.00 + \$3.00/GB per month
- **Server Licenses:** \$25.00 + \$3.00/GB per month
- **One time setup Charge:** \$45.00
